

EASTERN EQUINE ENCEPHALITIS

EEE is a **VERY SERIOUS** potentially **DEADLY** viral infection transmitted by the bite from a mosquito.

EVERYONE NEEDS TO JOIN THE C-R-E-W

CANCEL/CURTAIL

Outside events from dusk to dawn

REPEL

Wear insect repellent: DEET but not on anyone under 2 months old! PERMETHRIN but only on your clothes not on you! OIL OF EUCALYPTUS but not on children under 3 years old!

EMPTY

Empty all standing water you can find. Empty plant pots, toys, old tires, house gutters, stationary cars, tools, tarps, bird baths, holes in trees. Be creative; go on a daytime hunt for stagnant water and get rid of it.

WEAR

Socks, long sleeves and long pants. Cover up your skin so mosquitoes can't bite you.

Protect your children, yourself, your neighbors and your animals!

For help in choosing what kind of insect repellent to use, including alternatives to DEET: <http://pi.ace.orst.edu/repellents/>
