

## Go Solar Without Rooftop Installation - Community Shared Solar for Whately

Do you want to save on electricity costs through solar power but can't or don't want to put panels on your roof? Residents in the Town of Whately now have the exclusive opportunity to sign-up for a regional community shared solar farm being built in the town by Nexamp, the veteran-founded and Massachusetts-based solar provider.

Through Nexamp's *Solarize My Bill* Community Solar program, Whately households and businesses can take advantage of the environmental and economic benefits of going solar *without* installing solar panels on their property. By subscribing to a share of the clean electricity generated by a local community solar project, participants can directly offset their Eversource electric bill and save on electricity costs\* with no upfront investment or long-term commitment.

To learn more about how you can save while supporting local sources of renewable energy, visit [SolarizeMyBill.com](https://SolarizeMyBill.com) or call 800-945-5124 to speak with a member of the Nexamp Community Solar team.

How it Works:

- **Guaranteed savings** on electricity costs for up to 20 years
- **No installation** or maintenance of any equipment on your property
- **No sign-up costs**, no long-term commitment, and no service fees

\*Note: These savings would be applied *in addition* to discounted electricity supply rates from competitive third party suppliers.
